

DIARDE

Precise Measures from Photos

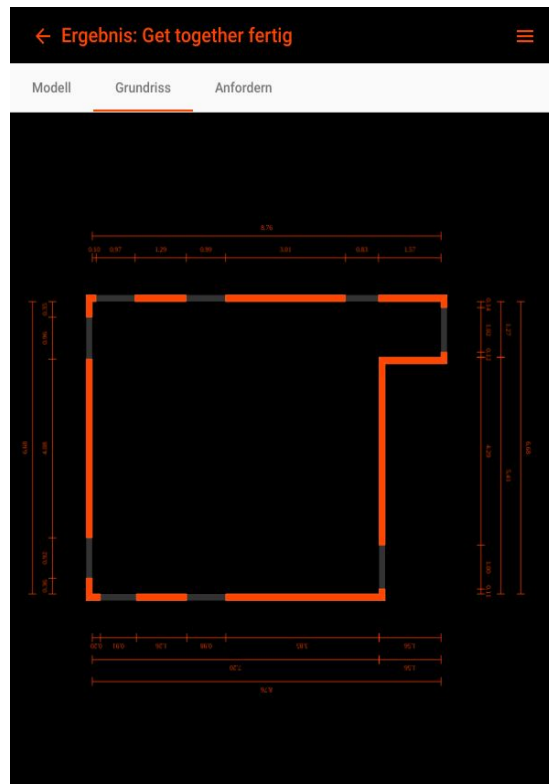

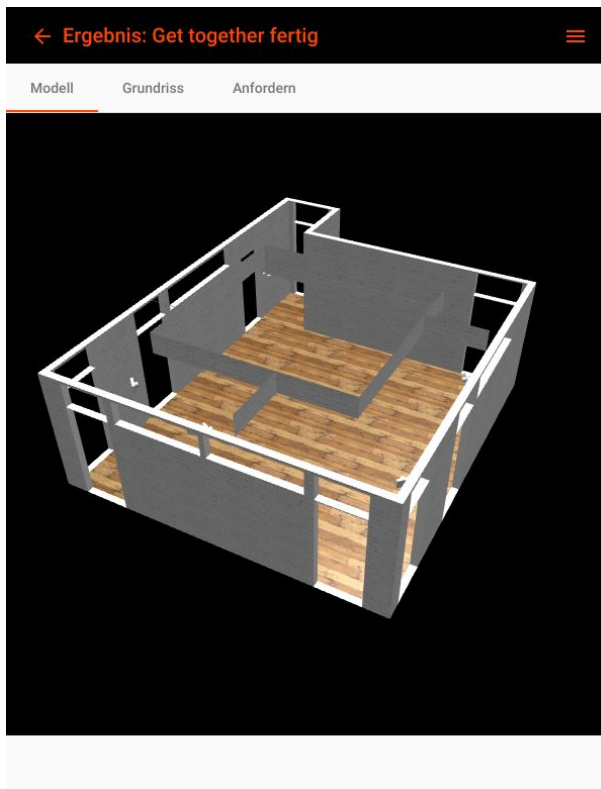

**Take and upload
your photos via our
mobile-app.**

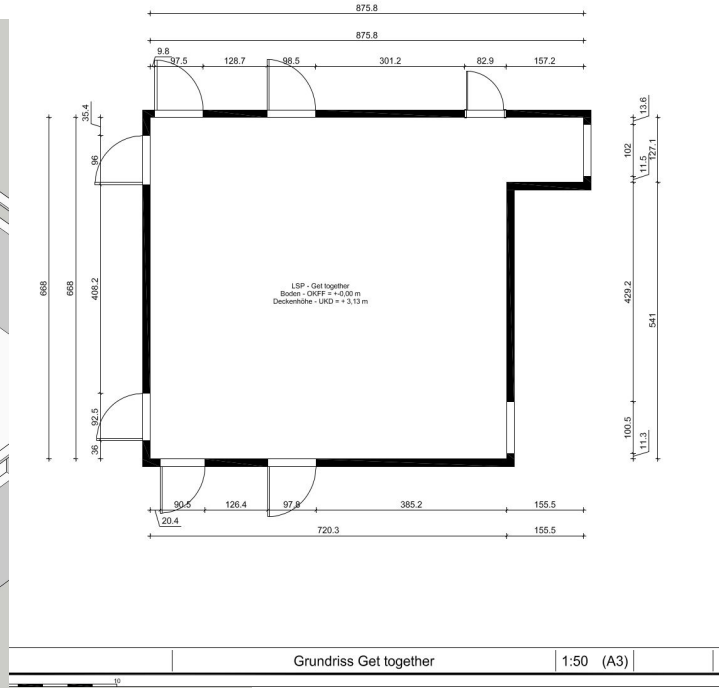

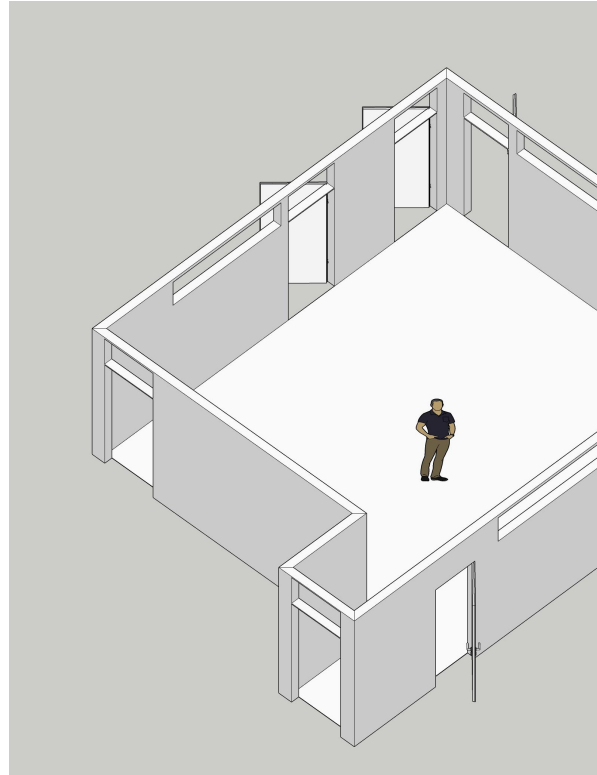

A few photos per room and one reference length (a A4-paper at the wall or a yardstick on the ground) are sufficient.

We extract the geometry, calculate measures and send a 3D-model and a floor plan to your mobile phone.

Additionally, you
get the results
edited and ready
for SketchUp and
AutoCAD.

Three principles
guided us while
developing DIARDE.

- **Simple:** A mobile phone, a reference length and just a little bit of practice.
 - **Precise:** Results are exact to the inch.
 - **Structure:** We provide CAD-models the way you are used to and no bloated point clouds.
-
